**USING AGENCY:** Wayne County Public Schools  
Goldsboro High School

**“Notice of Intent”**

Wayne County Public Schools intends to award purchase utilizing ARRA- Student Improvement Grant funding, as provided by US Department of Education, to Codework, Inc. - A Sole source Provider- For NetOp Vision Instructional Software.

**Ignite interest:** Communicate directly with your students, screen to screen. Whether you're sharing what's on your screen with the class, demonstrating a new skill from your PC to student smart devices, or working with someone one-on-one, the Vision classroom management software solution gives you a variety of ways to bridge the gap between your screen and theirs, while integrating relevant technology into everyday instruction.

**Focus attention:** Today, integrating school classroom management presents a challenge: how to focus your students' attention and keep them on task? Computer lab management and classroom management with Vision helps you do just that, letting your students access certain websites and applications while restricting others. You also have the ability to monitor student computers effortlessly, just to be sure.

**Improve grades:** According to an independent study, Vision classroom management software makes a significant, measurable difference in student achievement when teaching with technology: it actually improved student grades by a full letter step.
